Mobile: +92-323-9224479 / +92-331-6357494

Full Stack Developer with 5+ years of experience specializing in Laravel, Symfony, and modern JavaScript frameworks (Vue.js, Nuxt.js, React). Proven track record in building scalable e-commerce platforms and integrating third-party marketplaces like Amazon, Etsy, and Shopify. Skilled in API development, PostgreSQL optimization, Redis, Docker, and secure system architecture. Top Rated freelancer with independent project handling experience. Awarded Best Employer Certificate at Ahdus Technologies.

EXPERIENCE

Full Stack PHP/Laravel- Flaxen Paint Industry

04/25 – Current

- Architected a full-scale ERP system in Laravel & Next.js encompassing Inventory, Sales Orders, Invoicing, Customer Pipelines, and Production modules with role-based access control
- Engineered RESTful API middleware layer in Laravel handling cross-module data flow, authentication, and request lifecycle management across distributed ERP services
- Integrated Next.js frontend with JWT/session-based auth, server-side rendering, and dynamic dashboards consuming Laravel APIs for real-time ERP operations
- Designed relational database schemas supporting complex business logic across multi-module ERP workflows including procurement, order fulfillment, and production tracking
- Deployed and managed a live streaming infrastructure alongside the ERP platform utilizing Astra panel with custom port-server configurations for scalable media delivery

 - <https://flaxenpaints.com/>

Full Stack PHP/Laravel/Symfony – Smart Leading Solution Pvt Ltd

05/24 – 10/25

- Developed and maintained the PrintMood website, a PHP Symfony-based project with a secure PostgreSQL database managed via PgAdmin.
- Built custom APIs to connect the Symfony backend with a Nuxt.js frontend, ensuring fast and dynamic user interactions.
- Integrated third-party platforms like Shopify, Etsy, and Amazon to enable seamless e-commerce operations and streamline online sales.
- Led end-to-end project execution, from planning and development to deployment, focusing on backend architecture, database optimization, and secure integrations.
- Improved user experience by adding image customization features using advanced libraries and implementing new functionality based on client needs.
